

Combined Height Restrictor & Swinging Access Gates

PF5650 Combined Access Restriction

PF5650

The PF5650 combined height restriction barrier is constructed from a high quality steel rectangular box section.

It provides an ideal solution for the prevention of access for high vehicles to unauthorised areas, such as staff car parks or underground low level car parks. It is a durable and reliable restriction barrier available as single or double leaf, in either standard or heavy duty box section.

Clear signage allows vehicle occupants the opportunity to determine whether they have sufficient clearances to proceed under the cross beam in order to access.

The opening variants can be locked in either the open or closed position via an additional latch post or a padlock respectively. PF5650 height restrictors can be custom made to customer specification. Static versions (non-opening) are also available, for heavy duty versions & bespoke designs please contact our office.
