

## Surface Flow Plates

### PF5850 Surface Mounted Flow Plates

#### PF5850

The PF5850 surface mounted flow plate is an ideal solution for controlling one way traffic and is suitable for use on sloped entry or exit roads, in multi-story car parks or for economy projects.

The PF5850 surface mounted traffic flow control plates are bolted down to existing road surfaces where a substantial foundation/surface is already in place. No excavation of the road surface is required. A sophisticated inbuilt spring action ensures that the PF5850 returns to the upright position after a vehicle has passed over it.

Constructed from heavy steel, the flow control plate is designed to encourage a mono-directional flow of traffic, as well as deterring vehicles from entering if travelling from the opposing direction. Not suitable for heavy goods vehicles (Max 7.5 Tonne). We highly recommend the use of speed ramp and warning signage in conjunction with flow plates.

<b>Material</b>	Heavy Duty Chequer Plate Steel
<b>Dimensions</b>	570mm Long x 216mm Wide x 204mm Deep
<b>Finish</b>	Yellow with High Visibility Red Teeth - PPC
<b>Installation</b>	Surface Mounted, Ideal for Concrete Applications
<b>Weight</b>	17Kg
<b>Optional Extras</b>	Warning Signs Speed Ramp
