Steel PPC Counterweights

### Finish

Zinc Plated & Polyester Powder Coated

## Description

The PF5000-21STD manual barriers are a low maintenance, cost effective way of manually controlling access to unauthorized or controlled areas. We offer them in spans of up to 7m. The pivot assembly is made of steel box section, the zinc plated shaft pivots on two heavy-duty stainless steel bearing blocks. The design of the PF5000-21STD incorporates a locking mechanism, allowing you to securely hold the barrier in the raised or lowered position prior to applying the padlock. The counter balanced fish tail weight is adjustable to tune the balance of the barrier. The PF5000-21STD comes complete with a lockable end rest and aluminium arm and can be finished in either red and white or yellow and black as standard (other colours available). The PF5000-21STD barriers are designed for reliable performance, ease of use, and durability, making them a trusted choice for managing access in diverse environments.

## Safe & Secure

**As standard the manual barriers are able to be locked in the open position as well as closed. Although controlled by the user there are rubber stops to cushion the end of travel.**

Our manual barriers have been classed as the best in the industry. It has been designed to last using the best materials and components that we can buy.
